

מידעון הרשות - מרץ 2014

חוקר/ת יקר/ה,
אנו שמחים לשלוח לך את המידעון של הרשות למודלים ביולוגיים וקדם קליניים

הודעות

①

השתלמות 'שימוש אתי בעופות' תתקיים בתאריך 30.04 בין השעות 9.00-13.00
ברחובות בחדר ישיבות במח' למדע בע"ח. קומת מרתף.

ניתן להירשם באתר הרשות

<http://animals.huji.ac.il/courses/register.asp>

אם שאלות בנושא ההשתלמות ניתן לפנות לגב' טניה פומין tanyaf@savion.huji.ac.il

Harlan Mice Utilized in Patient-Derived Tumor Research

Learn more about how you can benefit from using our nude mice in your research.

Harlan's models have been used in several primary tumor research studies including those conducted on human brain, breast, lung, and pancreatic cancer tissues.

Harlan Laboratories' athymic nude mice were sourced for use in the breast cancer research study conducted by Cathy C. Zhang (and colleagues). C.C. Zhang is affiliated with a global pharmaceutical research and development organization.

In the paper, "Biomarker and Pharmacologic Evaluation of the γ -Secretase Inhibitor PF-03084014 in Breast Cancer Models", primary breast cancer xenografts were successfully grown in female Harlan athymic nude mice¹. [Click here](#) to learn more about the research design and results.

[Submit](#) your own cancer research publication using Harlan's oncology models to be included in our [online cell line reference tool](#) or a future publication spotlight newsletter.

Researchers can evaluate our research models through our model sampling program. Inquire about sampling or purchasing our oncology models.
